

Accelerating Value-Based Healthcare Implementation

The Clinician and HICT have partnered to offer healthcare organizations in Saudi Arabia the expertise and technology platform needed to implement and scale VBHC with impact.

The Clinician is a leader in the digital collection, analysis and utilization of patient-reported measures, offering real-world implementation expertise and a globally validated platform.

HICT

Hict is a healthcare consultancy with deep expertise in VBHC, health economics, change management, and program execution. We turn strategies into sustainable results through smarter resource use and better care quality — guided by proven methodologies.

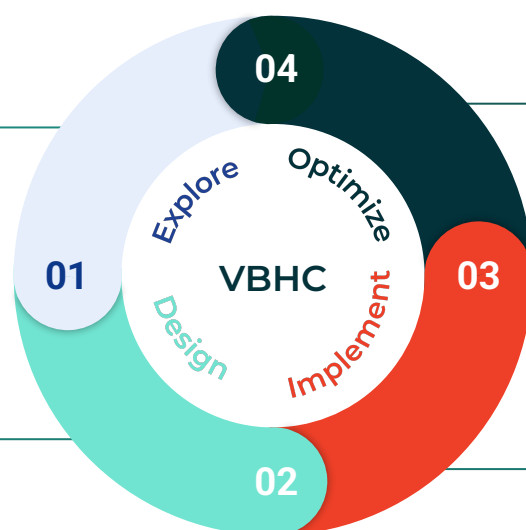

A complete end-to-end VBHC offering

Explore

Define your VBHC strategy through analysis of priorities, challenges, and opportunities.

Design

Co-design fit-for-purpose care pathways & data strategies that align with your clinical workflows.

Optimize

Refine and scale your VBHC model through actionable insights to deliver ongoing value and care excellence.

Implement

Leverage our platform and expertise to seamlessly collect, analyze and utilize outcomes & cost data to accelerate your VBHC goals.

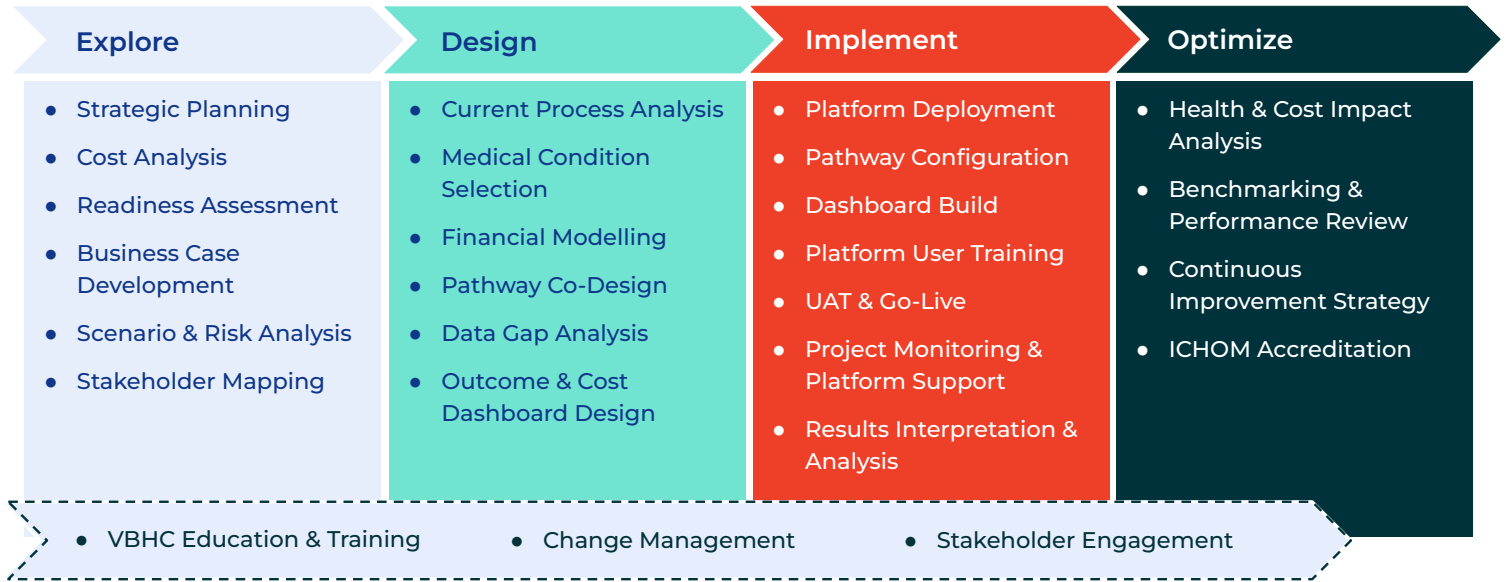

Our global impact

From public health systems to private providers and insurers, we support organizations globally to design and deliver successful VBHC programs.

Our offering – tailored to your needs

Whether you're starting your VBHC journey or seeking to scale your impact, we can support you at every stage – delivering our services as a full solution or as modular components tailored to your organisation's readiness, capacity, and priorities.

Powering our joint offering is The Clinician's purpose-built technology platform.

Trusted by providers and payers across 8 countries, including Saudi Arabia.

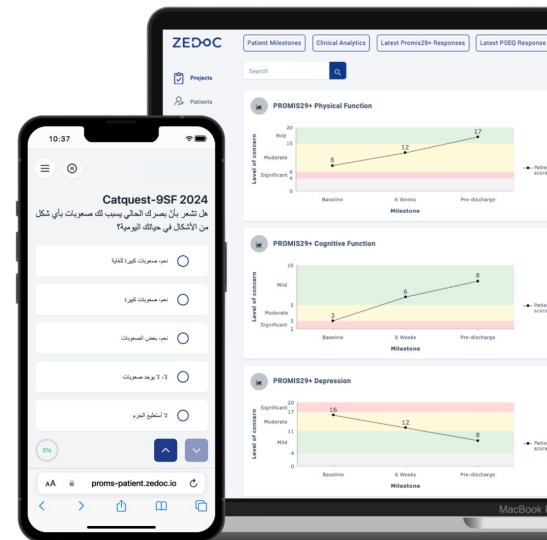

Validated arabic translations available across PRMs, CROMs and patient-facing tools.

Highly customizable to your unique clinical settings and requirements.

Fully compliant with local and international data privacy & security standards. All data securely hosted within Saudi Arabia.
