

Streamlining the collection of patient reported outcome measures to enhance lung cancer care

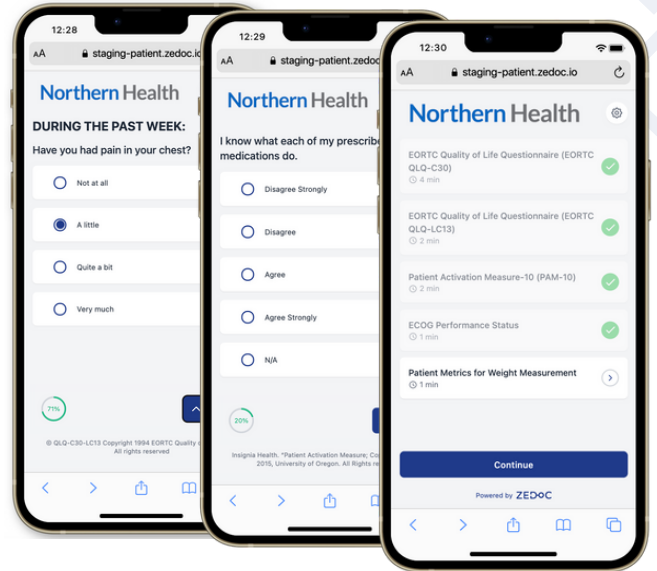

We are supporting Northern Health to measure, analyse and improve care from the patient's perspective with an integrated and intuitive digital PROMs pathway.

The Solution

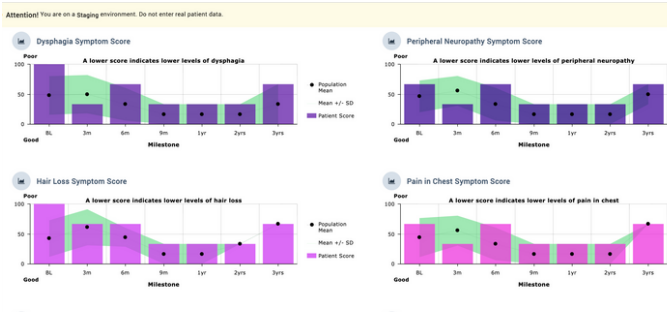

Pre-configured schedule of patient interactions to automate patient outreach and PROMs collection

Patients report and receive information on their own devices from anywhere via a simple web app

Real-time outcomes data fed back to care teams enabling patient-centred, shared decision-making

What patient-centred outcomes are collected?

- EORTC Quality of Life (QLQ-C30)
- EORTC Quality of Life - Lung Cancer (QLQ-LC13)
- Patient Activation Measure-10 (PAM-10)
- Self-Administered Comorbidity Questionnaire (SCQ)
- ECOG Performance Status
- Patient Metrics for Weight Measurement

Key Features

Patient content is available in 5 languages

Pathway is integrated with existing IT systems

Video content is embedded in pathway interactions

Empowering you to deliver the care that patients need and want
